

CHILD CARE COUNCIL
Serving Columbia Greene and Ulster Counties

#### **Child Care Council Staff:**

**Team Leader -** Carroll Sisco, (845) 331-7080, ext. 131

**Ulster Physical Location:**39 John Street, Kingston, NY 12401

**Ulster Mailing Address**: PO Box 3718 Kingston, NY 12402

Phone: 845-331-7080 Fax: 845-331-0526

cccouncil@familyofwoodstockinc.org

**Hours:** Monday-Thursday, 8am–5pm & Fridays, 8am - 4pm

**Ulster County Staff:** 

**Program Directors** - Kerry Wolfeil, ext. 133

**Assistant Program Director -** Penny Dombrowski, ext. 132

Registrars - Bonnie Kudlacik, ext. 138 and Diann Keyser, ext. 135

Parent Counselor - Jessica Markle, ext. 126

Food Program - Cindy Eggers, ext. 130 and Tamar Reed ext. 137

Legally Exempt Enrollment - Penny Dombrowski, ext. 132 and Tamar Reed, ext. 137

**Trainings -** Diann Keyser, ext. 135

**Reception -** Margie Knox

Columbia/Greene Location: 160 Fairview Ave. Suite 207 Hudson, NY 12534

Phone: 518-822-1944 Fax: 518-822-8233

cccg@familyofwoodstockinc.org

HOURS: Monday-Thursday, 8am—4pm & Fridays, 8am - 3pm

**Columbia & Greene County Staff** 

**Program Director -** Cheryl Brush-Elsinger, ext. 105

Assistant Program Director - Suzanne Holdridge, ext. 101

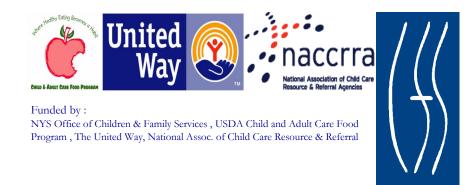

Registrars - Suzanne Holdridge, ext. 101 and Carey Braidt, ext. 103

Parent Counselor - Kristin Scace, ext. 104

**Food Program -**Carey Braidt, ext. 103

Trainings - Carey Braidt, ext. 103

**Legally Exempt Enrollment -** Laurie Vogel, ext. 102

### JESSICA MARKLE

# Learning Disabilities in Children

#### EARLY HELP MAKES A DIFFERENCE

2013/2014

## What's inside:

- What are learning disabilities
- Different types of learning disabilities
- Signs of Learning disabilities
- Treatments for Learning disabilities
- Coping with Learning disabilities

#### LEARNING DISABILITIES IN CHILDREN

## What are Learning Disabilities?

Learning disabilities result from a variation in your child's central nervous system functioning. Learning disabilities tend to run in families. About 50% of these children have a parent, sibling, or extended family member with a similar difficulty.

Learning disabilities can vary in severity. They may affect a single learning task like spelling, or they can influence many of them, like reading, writing, and listening comprehension.

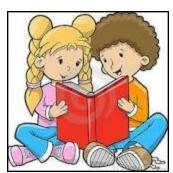

Learning disabilities can last a lifetime, becoming more or less obvious depending on the academic and other learning demands. However, with help the learning disabilities often tend to improve.

## The Impact of Common Learning Disabilities?

Learning disabilities generally affect 3 general skill areas:

- 1. Academic skills such as reading, writing, spelling, and arithmetic
- 2. Language and speech skills such as listening, talking, and understanding
- 3. Motor-sensory integration skills, such as coordination, balance, and writing

When problems exist in any of these areas, there is a breakdown in one or more stages of learning.

#### **ACADEMY OF ORTON-GILLINGHAM**

Dyslexia

http://www.ortonacademy.org/index.php

"For someone diagnosed with a learning disability, it can seem scary at first. But a learning disability doesn't have anything to do with a person's intelligence-after all successful people such as Walt Disney, Alexander Graham Bell, and Winston Churchill all had learning disabilities."

(Professional Development Program, 2011)

## DYSLEXIA

## What is Dyslexia

• Specific in reading, writing, and auditory processing

FAMILY'S CHILD CARE COUNCIL

- Difficulty with word recognition decoding & spelling (letter recognition)
- Problems with reading comprehension vocabulary
- Neurological and often genetic

## Signs in Young Children

• Trouble with recognizing letters, matching letters, pronouncing words, learning & correctly using vocabulary words, learning alphabet and numbers.

## Signs in School-Age Children

• Trouble with rules of spelling, remembering facts & numbers, handwriting, learning new skills, reading & spelling (reversing letters), following a sequence, and math word problems.

#### **Treatment**

- 1. Help to identify a learning disability as soon as possible.
- 2. Help from a tutor, teacher, or trained professional.
- 3. Expose child to early oral reading, writing, & drawing.
- 4. Encourage development of print knowledge and basic letter.
- 5. Have child practice reading different texts.
- 6. Practice using sight, sound, & touch while introducing new ideas.
- \* Multisensory teaching techniques and strategies stimulate learning by engaging students on multiple levels. They encourage students to use some or all their senses.

#### LEARNING DISABILITIES IN CHILDREN

## ADD/ADHD

## What is ADHD?

Attention deficit hyperactivity disorder (ADHD) is a disorder that appears in early child-hood. You may know it by the name *attention deficit disorder*, or ADD. ADD/ADHD makes it difficult for people to inhibit their spontaneous responses—responses that can involve everything from movement to speech to attentiveness.

- Attention deficit hyperactivity disorder (ADHD) is one of the most common childhood disorders and can continue through adolescence and adulthood
- Children have a hard time staying focused & paying attention
- Have difficulty controlling behavior
- Over active

## Signs of ADHD

#### **INATTENTION**

Easily distracted, forgets things, difficulty focusing, becomes bored, daydreams, becomes confused, and moves slowly

#### **HYPERACTIVITY**

Fidgets, talks non-stop, trouble sitting still, and is in constant motion

#### **IMPULSIVITY**

Impatient, blurts out inappropriate comments, shows emotions, often interrupts, and difficulty waiting for thing

#### **Causes of ADHD**

Many studies suggest that genes play a large role in ADHD however, scientist are not exactly sure what causes ADHD.

#### **Treatment**

#### There is **NO CURE!**

However, treatments include medication, various types of psychotherapy education or training, or a combination of treatments.

#### Page 5

## AUTISM

## What is Autism

Autism Spectrum Disorder (ASD) is a group of developmental brain disorders. There are varying degrees of autism including; social interaction, verbal & non-verbal communication, repetitive behaviors, difficulties in motor coordination & attention. Some autistic children excel in visual skills, music, math, and art.

There are 5 disorders of Autism:

- 1. Autistic disorder
- 2. Asperger's disorder
- 3. Pervasive development disorder
- 4. Rett's disorder
- 5. Childhood disintegrative disorder

## Signs of Autism

Most obvious signs tend to emerge between 2 and 3 years of age. There are 3 areas that are usually affected by autism:

- 1. Social impairment
- 2. Communication difficulties
- 3. Repetitive & stereotyped behaviors

## **Causes of Autism**

There is no one cause and no one type of autism. Rare gene changes, mutations, and environmental factors all influence early brain development which in fact can affect children.

## **Treatments of Autism**

#### \*\*START AS SOON AS CHILD IS DIAGNOSED WITH ASD

- It is recommended that children receive a number of vaccines early in life to protect against dangerous infectious diseases
- Treating ASD early using school based programs and proper medical care can reduce ASD symptoms
- Early intervention
- Provide challenging learning activities
- Special training for parents & families
- Have a structured routine
